Mr. Ernest R. Cooper:

This letter will verify the fact that you heard this station on Sunday morning, 2/12/67, from 5:30 to 5:49 a.m., E.S.T. on its regular schedule. Thank you for your reception report which was correct.

WBAG is a daytime only Broadcast Station with an output power of 1000 watts. We employ a RCA 1000 watt transmitter that feeds the AM antenna that has the maximum height of 209 feet.

WBAG also has an FM operation that is a twenty four hour service. Its frequency is 93.9MC. We have a RCA 1000 Watt transmitter feeding a four bay antenna that is mounted at the top of the AM tower. This gives us an effective radiated power of 2800 watts.

Sincerely,

*Derrell W Johnson*

Chief Engineer
