

WMNC

Morganton, North Carolina

AM - 5000 Watts
FM - 3000 Watts

1430 kcs.
92.1 mcs.

January 21, 1966

Dear O.M. Cooper,

This will confirm your reception of WMNC on the morning of January 14, 1966.

The Chief Engineer here does not confirm any signal-reception reports, But being a ham, I like to snag that rare station too, so here is your confirmation. WMNC conducts frequency tests on the 2nd Sunday night (Monday morning) of each month from 12 MN - 12:20 AM.

Best of DX.

Charles E. Carter WA4FOF
Assistant Engineer
