August 4, 1976

Mr. Ernest R. Cooper
National Radio Club
5 Anthony Street
Provincetown, Mass.

Dear Ernest:

Thanks for a real great and entertaining letter.

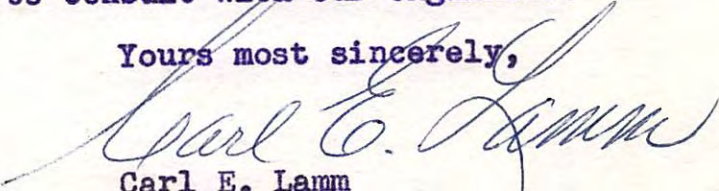

It gives me a real pleasure to confirm your reception of W M P M on the morning of July 31, 1976. All of the details submitted were correct, and letters such as yours are always helpful to our engineers.

Thanks for the picture.

Our proof of performance tests were being conducted by Mr. Lew Parrish, Chief Engineer at WPTF, Raleigh, North Carolina. Mr. Parrish supervised the project in South Viet Nam that built an ultra powerful transmitter beamed toward Hanoi. He has designed and built ultra powered transmitters in many remote parts of the world, and is one of the most knowledgeable radio people I've ever had the pleasure of knowing. It was his voice that you picked up during the test. He was with WOR, the flagship station of Mutual for about 14 years also.

Again, thanks a million. About your idea for a special equipment test I'll need additional time to think about it and to consult with our engineers.

Yours most sincerely,

Carl E. Lamm
General Manager W M P M
