Mr. Ernest R. Cooper, Editor
438 East 21st St.
Brooklyn 26, N. Y.

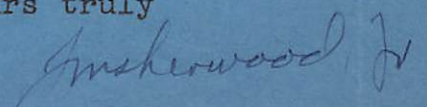

Dear Sir:

Thanks very much for your very nice report on reception of our frequency check program of May 24th.

Your description of material heard checks with our log, and I hope that this letter will be sufficient confirmation for your files.

RCA does it with highly directional antennae, which is no mystery. The mystery is a gadget they use which will take two sigs of about the same strength and separate them by the amount they are out of phase with each other. Hi.

Yours truly

J. M. Sherwood, Jr.
