

Nov. 4, 1950

Mr. Ernest R. Cooper
Brooklyn

Dear Mr. Cooper:

This is to verify your reception of our station, WTQB. Your transcript of our sign-off is substantially correct.

You're located on one of our minor lobes since Richmond & Asheville share our channel. Our max radiation is 131° E of N which makes it SE. We use 1 KW directional 4 tower night & day.

I'm writing from the Xmitter where we have no company stationery so please excuse this paper.

We make no frequency broadcasts. Our operate time is 5:30 am to 1:05 am except Sunday which is 7:00 am - 12:05 am.

Our daytime coverage is a lot poorer with the present setup because of the higher frequency & the restrictions of a directional array.

Personally, I have been W8 MHH, Pittsburgh,
W2SKY, Newark & am now W4SKY.

Again, to whom it may concern:

This is a verification of reception of
WTOB, Winton Salem, NC on Oct 31, 1950 on
1380 kc

73,

Russell Spikula, W4SKY
Chief Engineer WTOB
