VERIFICATION

Ernest R. Cooper
National Radio Club
438 East 21st Street
Brooklyn 26, New York

Dear Mr. Cooper:

This letter is a little late but we hope that it will serve to verify your reception of KAWL as outline in your letter of September 17, 1954. This was in reception for September 13.

We were on our third morning of equipment tests which continued until September 20 when we began regular scheduled broadcasting.

We were interested in your statement regarding the old KGBZ in this city. York has a population of about 6000 people. We are known as the "Nation's Egg Center".

On October 27, we hope to present a special dx test program in behalf of the National Radio Club. You will receive the particulars from either Marvin Robbins or Maurice W. Nittler. We hope that you will be tuned in for this and will have better luck with our signal.

KAWL's equipment is Gates throughout with a 200' tower. We are located at the south end of the city. If you are ever out this way drop in and visit us.

Yours very truly,

Mel Gleason

Mel Gleason, Chief Engineer
