Ernest R. Cooper
438 East 21st St.
Brooklyn 26, New York

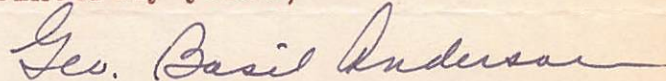

Dear Mr. Cooper:

This verifies your report on your reception of KJSK. We have been so flooded with mail from all sections of the country that we have been unable to answer you sooner. I trust you will understand. We were really pleasantly surprised to find that KJSK is reaching out into so many spots on the map during our test period.

Radio Station KJSK is a new station, going on the air for daytime broadcasting April 28th. Our power is 1000 watts. The transmitter is Gates 1000 watts BC1E. A quarter wave 260 foot series fed Wincharger tower is our antenna. The response from the many listeners during the wee hours in the morning made it possible for the engineering department to know that the coverage was complete for the antenna used.

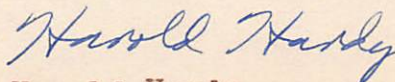

We especially want to thank the members of the National Radio Club and other DX fans as well as occasional passing listeners which gave us such a complete report as to how the station was received at their listening point. Thank you again for writing.

Sincerely yours,

Geo. Basil Anderson
Owner - Manager

and

Harold Hardy
Chief Engineer
