March 10, 1975

Mr. Ernest R. Cooper
7 A Washington Avenue
Provincetown, Massachusetts 02657

Dear Mr. Cooper:

May I appologize for not writing to you sooner. As you know, things pile up, and soon one must clear down to whats on the bottom of the pile. Thus I found your letter of January 10, 1975. How Awful!

Yes, I am able to verify your reception of WSCV. You were listening to Rich Bjorklund, our afternoon/sports announcer. As you mentioned, he was to be broadcasting a basketball game that evening on WSLE FM Stereo 92.1.

WSCV as you may know is a relative newcomer to the scene. We went on five years ago this coming May. WSLE is still younger, only 2 years old this past November. The reception of WSLE might interest you though. WSLE operates on 92.1 megahertz at 140 watts effective radiated power. We have had listeners write us from Quincey Mass, and North Attleboro Mass, as well as calls from Holyoke. Quite a distance for the power. This is due to our great altitude of over 2100ft.

Again, sorry for being so tardy in my reply, and I hope you are able to listen to us... through the static and all.... maybe we can count you as a regular.

Sincerely,

Michael M. Colby
Program Director
