MANY THANKS FOR YOUR RECENT LETTER. AND THANKS A LOT FOR TUNING IN. ALSO RECEIVED A LETTER FROM A CLUB MEMBER ON STATEN ISLAND WHO HEARD THE TEST. YOUR REPORT IS ACCURATE. I SHOULD ALSO SAY TO THAT AT THE TIME OF THE TEST WE WERE MODULATING ONLY 50%, SO THIS MAY HAVE SOME EFFECT ON THE SIGNAL AT A DISTANCE.. THE TONE CREATING A SINE WAVE OF COURSE IS HARD TO MODULATE 95 OR 100%, WITHOUT THE TRAMNSMITTER GETTING TOO HOT. HOWEVER NEXT TIME WE MAY JUST FOR A FEW MINUTES RUN IT FULL BLAST.

OUR FUTURE TEST ARE NOW SET FOR THE LAST THURSDAY MORNING OF THE MONTH. NEXT ONE WOULD BE OCT.28, BETWEEN 12:30 and 1AM... DUE TO THE FACT OUR TRANSMITTER IS LOCATED ON AN ISLAND IT MAKES IT DIFFICULT TO GET TO ALMOST ANY TIME, AND THIS WOULD KEEP US FROM ANY MONDAY MORNING BROADCASTING, BECAUSE THE WEEKEND ENGINEERS HAVE ALREADY LEFT THE SITE. AGAIN MANY THANKS FOR YOUR REPORT.

SINCERELY YOURS,  
*Dick Tyler*
