Dear Ernest:

This is to confirm your reception of WKMB on March 5 1972.  
During the month of June WKMB broadcasts untill 8:30 P.M. Tnx  
very much for tuning us in and we hope you will listen in the  
near future.

By the way the adress of our studios is at the top of this  
sheet.

Yours truly,

  
Chief Engineer

July 24, 1972

Dear Mr. Cooper,

I am terribly sorry for the delay in responding to your letter dated March 6, 1972, but due to various shifts in personnel, your letter was misfiled until I noticed it.

This letter is to verify your reception report of WKMB on Sunday, March 5, 1972. According to our program logs, your report is correct as stated.

WKMB is a relatively new station, and we have been on the air since February 17, 1972. We operate from Stirling, New Jersey, with 250 watts omni directional. We utilize a 147' tower to give us  $5/8$  wavelength signal. Our transmitting equipment utilizes a RCA 1KW transmitter stripped down to 250 watts. Since we are omni directional, there is no need for phasing and all vital transmitter functions can be monitored from the studio remote control unit. Our studio facilities include the newest types of intergrated circuit monitoring equipment, including a CCA audio board, a RCA 6CB6 studio consol, 2 QRK Turntables, several continuous loop cart players and a whole bunch of air personalities.

I want to thank you for your verification report, and hope to have more favorable reports from Brooklyn. If you are ever in the area on a weekend, feel free to stop up and say hello.

*David S. Shefts*

Production Assistant

PS-I don't think we will be conducting any tests in the immediate future, as all tests are made about midnite on weekends
