Brooklyn, N.Y.

Dear Sir:

This is to confirm your perseverance in digging one of our back lobes out of WFBR, WAVZ, et al, on Friday, Oct. 22, 1965. Your feat is especially to be commended, because at that time we were, pursuant to FCC authorization, running 500 watts, our pre-sunrise power (daytimes, we're 5KW).

Test programs right now are pretty much out of the question, due to our being rather short handed.... I'll let the NRC know when a regularly scheduled test will be possible, though.

Yours truly,

Gary Woods
Maint. Dir., WEEE
