Ernest R. Ceepor
5 Anthony St.
Provincetown, Mass 02657

Dear Mr. Ceepor:

This letter is to confirm your reception report of WHHO (AM) at 1320 KHz on the morning of July 1, 1977 at 1:23 am (edt).

In regards to your request for a DX-test; at this time I do not feel it would be in the best interests of WHHO radio.

We do have a regularly scheduled monthly test for both WHHO and WHHO-FM. That occurs on the Sunday night (Monday morning) of the week that has the 15th in it. This is our monthly frequency check and it takes place at 12:45 local time.

Thank-you for your reception report. We do appreciate the reports, but at this time I would rather not do a DX-test. Perhaps next year.

Sincerely,

Ralph L. VanDerLinden
Chief Engineer
