Brooklyn NY 11226

Dear Mr. Cooper;

Somehow your original report did not receive an answer...I'm sorry about that as I usually make it a point to answer such reception reports personally. In a way you are right about small staffs since I hold several titles! AND I also hold a First Class ticket...but my primary job is News and Program director since I handle daily routine inspections of the equipment and we have a Contract engineer who comes to us one time a week to handle the various things which need doing only once in awhile..he also handles the frequency checks. However, since I'm also a "Ham" radio operator, when I receive reports I try to answer them...apparently somehow I placed your original letter to one side and then forgot to answer it before it was filed away, since we usually keep all such reports...please forgive the delay, and thanks for your letter of Jan 11th calling my attention to the fact I had not answered your previous report... Our frequency checks are made with Cambridge Crystals...usually near the end of the month from about the 20th on...and sometimes every month, sometimes every other month since we do not have a regular schedule..our contract engineer handles work for several stations, and works in our frequency check between others he handles..usually they are about 12:30 AM or shortly before that hour....

Many thanks for your letters...I'm also enclosing a coverage map..on which you'll note we also operate an FM station ...FM operation is 6am until midnight...you might give that a try sometime....3,000 ERP at 102.3Mc.
