November 3, 1972

Mr. Ernest R. Cooper
438 East 21st Street
Carrier Route 56
Brooklyn, New York 11226

Dear Mr. Cooper:

I'm very sorry you didn't receive the reception report as it was intended to be sent with the coverage map.

A couple of points:

1. We are a regional clear channel according to the FCC
2. I have only been Chief Engineer since October 1970.

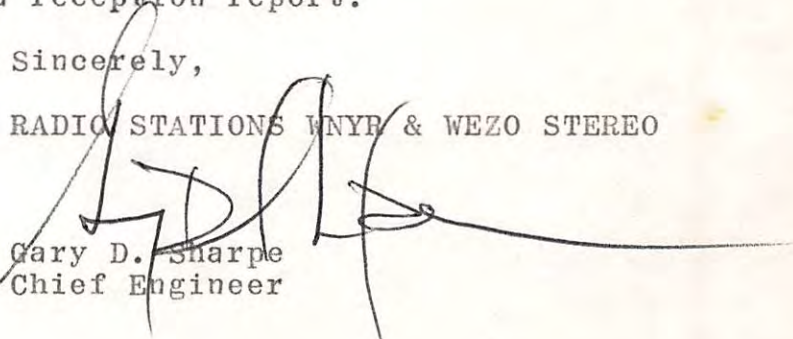

I ususally run my proof in February or April of the year and almost always on Monday morning. I also run a stereo proof for our FM Station WEZO at 101.3 MHz. If the sunspots are right or there's an Aurora Borealis that might be a catch for you.

In closing, I might add that I often run modulation tests on Monday mornings (at least once every 2 months) as we are always trying to improve, if not just maintain, the quality of our AM air signal which is considered in many circles to be the best sounding in the area.

Enclosed please find a reception report.

Sincerely,

RADIO STATIONS WNYR & WEZO STEREO

Gary D. Sharpe
Chief Engineer
