Ernest R. Cooper
5 Anthony Street
Provincetown, Mass 02657

11/28/90

Dear Mr. Cooper:

Thankyou for your reception report. Please note that we have changed our call sign again back to WRHD. We had been using WRHZ while we were using the Z-Rock format. Since Z-Rock did not sell very well we changed to the country format and changed calls as well.

Most of the original transmission equipment from 1963 is still in use. The Collins 20V2, Collins phasor and the two tower antenna. It is interesting to see how skip works on 1570 since the nighttime power is 500 watts compared to 1000 daytime. Usually the signal goes about 5 miles or so before fading occurs. I would be interested in knowing wether you can hear us consistently during the night at your location. Our directional pattern has remained the same since 1962 and we recently went to 24 hours when we changed to the country format.

Best Regards,

Bob Anderson
Chief Engineer WRCN, WRHD
