December 10 1947

Mr. Ernest R. Cooper  
438 East 21st Street  
Brooklyn, N. Y.

Dear Mr. Cooper,

Thanks to you Sir, on several counts. First for calling us during the program. Too bad we didn't know you were going to call at that particular time. Had we known who was calling, we would have broadcast our side of the phone QSO. Then secondly, we want to thank you for the very nice letter. The longer we remain in the radio field, the more we are convinced that it's the swellest sorority in the world. I may be a bit prejudiced, having been in radio for some twenty years.

I happen to be from the old school of BCL's myself and always said that if the chance ever came to use the facilities of a radio station, fellows who like to log stations would certainly have the opportunity of logging ours. It is a rare pleasure to fire up the xmitter and put on a few records for the benefit of the Night Owls, better known as BCL's. We get as much of a "jar" out of putting on the program as you fellows out there get out of logging us, so everyone is happy.

We don't have a receiver out here at the transmitter house, and it's a darned shame too. We could have listened for opposition on the channel and probably benefited from it, however, we could not have changed our schedule since the time was advertised as 3:30 AM. Some one of these times when the 1400 kilocycle channel is open, don't be surprised if you hear WHUN blasting through the ether.

Your report of the D-X program tallies perfectly with our log, therefore we are happy to verify your report. Thanks again for everything, 73's es CUL.

Yours for more D-X,

*James Hapewell*  
*C. E.*

Seasons Greetings.

P.S.

Our sincere thanks for the help the National Radio Club so heartily gave us. You boys are doing a grand job..keep up!!
