P. O. Box 191
State College, Pennsylvania

Dear Ernie

Thank you for your letter of 21st ~~Nov~~^{Oct} reporting reception of our first test broadcast and I wish to confirm your report

We have been quite busy here running a daily frequency check at 3 AM and all the usual and one thing necessary to getting a new station on the air. So I hope you will excuse my tardiness in replying to your report.

For your information our original frequency on that first test was 1427.3 as reported by RCA Riverhead NY. We had quite a rough time that night one of the leading manufacturers sold us a bad crystal. But everything is all straightened out now.

Again thanking you and hoping that you have very success in your Xing. I remain

Sincerely yours
