Provincetown, MA. 02657

Dear Ernest,

I would be most happy to confirm your reception of Radio Station WQTW on 2-28-82. All of the information that you received is correct.

If you call receiving WQTW an unexpected pleasure, then I'm sure you will be even more surprised to learn that I was using our pre-sunrise power output of only 300 Watts!

WQTW's studio operation is located at 800 Ligonier St. and our transmitter site is $\frac{1}{4}$ mile outside city limits at 157 Cutie Lane, Latrobe. We use a Collins 820 D-2 transmitter and Shunt feed a 152 foot tower. Daytime power output is 1000 Watts with 300 Watts pre-sunrise.

Thank you very much for the report and keep up the good work!

Best 73's,

Sam
