Provincetown, Mass. 02657

Ernest,

This is to confirm your reception of radio station WTSU on Sunday, May 25. WTSU operates at an effective radiated power of 100,000 watts at 89.9 MHz. Our transmission facility is located 22 miles north of Troy in the small community of Pine Level, Alabama. Equipment at Pine Level includes a Harris FM-25K transmitter and an electronic research FMH circularly polarized antenna (10 bays) atop a 490 foot tower.

It seems that Sunday, May 25 was a great day for DX because we also received a SWL report from a man in Chevy Chase, Maryland who heard us at the same time you did. Here's wishing you the best of luck and good DX.

73.

Sincerely,

John Brunson
Chief Engineer
Southeastern Public Radio Network
