Dear Ernest:

Thank you for your letter of July 1st reporting the reception of CKO-FM 9 on 103.5 MHz from Halifax, Nova Scotia. Please accept this letter as verification of your reception report as dated.

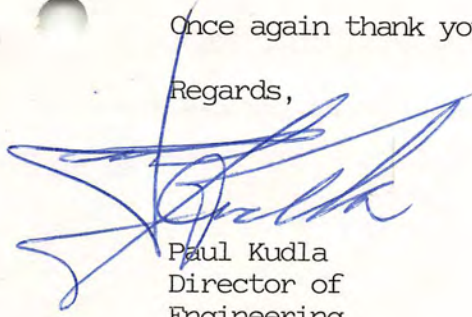

CKO Halifax is the newest station of the CKO Network going on the air, on January 1st of this year.

You mention receiving CBH on 102.7 MHz and C-100 at 100.1 MHz during the same time period which would make sense as we are all located together. CBH and ourselves combine our signals into the same antenna and C-100 is about a 1/2 mile or so north of the CBH tower. We all run 100Kw ERP. Although the CBH tower is slightly higher than the C-100 tower.

I have enclosed some information on the Network and hope this will provide some additional information on CKO for you.

Once again thank you for your letter and good Dx'ing and best of 73's.

Regards,

Paul Kudla
Director of
Engineering
