15 July 1986

Dear Mr. Cooper:

Thank you for your letter of 10 July.

Your information identifies our morning drive program with host Ken Martin.

His reference to "our other side" concerns the fact that during the midnight to 6 AM period we play jazz.

Presently we are operating at half power, 48KW ERP. Our antenna is at 1040 feet. Soon we will return to full power.

If you ever pick up WQRS-FM in Detroit, that is our sister station. They are a full classical format and were just granted a power increase to 62KW ERP. Their antenna is at 782 feet.

Best wishes for future DXing.

Yours,

Marc Smith
