Dear Mr. Cooper:

This is to verify your reception of WMBI-FM on the afternoon of Tuesday, July 14, 1987. A check of the program log and conversation with on-air personnel revealed that what you heard was indeed transmitted at that time.

WMBI-FM transmits from the western suburb of Addison with a "grandfathered" power of 100kw at 500 feet. Our seven-bay Phelps Dodge FM antenna is located on top of the WMBI radiator. This tower is an old Blaw-Knox model, and was installed in 1935. As you point out, we have been in business for a long time.

Wendell P. Loveless has long since retired, and is living in Hawaii. He must be nearing the century mark. We often wish more recordings of his voice were available.

Thanks for listening.

From one left-hander to another,

Bob Caithamer
