Ernest R. Cooper
National Radio Club
5 Anthony Street
Provincetown MA 02657

Dear Mr. Cooper:

Apologies all over the place!

I was going through my box and came across your letter of July 16, 1980 telling of your reception of WDLM-FM.

I would like to confirm your reception as stated in the letter. I do not have any coverage maps, but the FM outlet is a circular pattern covering approximately 60-70 mile radius and the AM is a type of figure 8 with major lobes north and south, and a minor lobe to the east. Our AM is 1000 Watts and our FM went on the air January 20, 1980 with 100 Kwatts. Since July we begin at 5:30 am and sign off at 1:00 am, except on Sundays which is midnight.

I just ran my AM proof on August 12, but will probably test on the air October 27 early AM, approx. 12:30 am - 1:00 am.

Once again, I'm sorry for missing your letter. In July we were completely re-doing the A.M. feedline and ground system and then I had to run the RF proof of performance and then got away on vacation for a couple of weeks. Now we're getting ready for an open house here at the studios, so that's my only excuse.

Thanks,

Glenn Rogerson
Chief Engineer
