

R. Hale Co
WSGS Radio
Hazard, Ky
Nov. 11, 1978

Dear Ernest,

Ran into your envelope in my files
could not locate your letter however.
I am still in shock from your reception
report of WSGS. Princeton truly is a
"far piece" from Hazard.

We are running a 20 kilowatt Collins + Remington
into a 10 Bay Dual Polarized Jampco antenna on
a 500' tower 1100 feet plus above average terrain.
Our coverage is Great but Princeton is the
furthest Reception Report we have had.

Sorry for the delay in answering your
letter. It was a pleasant surprise to hear
from you. God Bless

Sincerely,
Robert Hale Co. E.
