Ernest R. Cooper
National Radio Club
5 Anthony Street
Provincetown, Mass. 02657

Dear Mr. Cooper,

Thank you for your recent letter. I am most happy to verify your reception of our programming on September 18, 1979. As far as I know from listener responses, you are the furthest.

However, you may not hold that title for long. We have filed with the FCC for a power increase to 250 watts and, if approved, hope to be operating at that level by September of 1980. I would hope you would notice a significant increase in our signal at that time.

By the way, the program you described concerning the space shuttle is called "Star Date", a daily, taped program sent to us by the University of Texas. As you can tell by its title, it is concerned with daily star formations and Astronomy.

The station is operated by students at Cape Cod Community College and its primary format is rock music. We do, however, program jazz and classical as well as features like the program you heard.

Again, thank you for your interest and appreciate your letter.

Sincerely,

Dale B. Lumsden

Dale B. Lumsden, Manager
