Mr. Ernest R. Cooper  
5 Anthony Street  
Provincetown, MA.

02657

5 June 1984

Dear Ernest,

We are very pleased to hear from you ... in that knowing we can be heard all the way out on the point is very interesting. I also understand that you are using a high-powered receiver to pick us up.

I am the program manager and with my knowledge of the format we are running, all of the information you report hearing was, in fact broadcast. The personality's name on the overnight shift, however, is Dave Bickford.

Just for your information: our transmitter is located in Leominster. The tower is 400-feet on land owned by the Leominster Sportsmens' association. It's also situated fairly high on a hill.

Also for your information: the chief engineer at the station is Blair Harden. He is very knowledgeable and can provide you with much more technical information. He also does some engineering consulting work for WBOS in Boston. Our general manager is now J-T Shrigley. Joe Gunther and Toby Piro are no longer with us.

I hope this helps you. Our temporary sales operation is located at the address above. But if you have any other questions, please write to me, Blair or J-T at P-O Box 960, Fitchburg 01420. We will be moving to Worcester center in the fall. The station is licensed to Fitchburg ... but we have the dual designation Fitchburg/Worcester.

Thank you again for your interest.

Sincerely,

Jay Eric Deane  
Program Manager
