Dear Sir:

This letter will confirm your reception of WEBB-98.5
mHz on Sunday, August 20, 1995 from 0722 to 0744 EDT.

Your program details were very accurate.

WEBB broadcasts with an ERP of 60.7kw (H&V) with
antenna 93 meters above average terrain. N 44o 33' 52" W
69o 36' 39".

Have you ever checked out FM reception on a good
Walkman on a commercial airline flight? Not always
permitted by the airlines; but it's unbelievable what you
can hear at 20,000 feet.

Continued good fortune DXing.

Sincerely,

Tom Mitchell
Operations Manager
