Greetings Mr. Cooper,

What a real surprise to receive your letter! We have heard from other DX'ers, but yours is by far the furthest our signal has been heard. This letter verifies your reception of the broadcast sighted in your letter.

WIKB-FM operates at a nominal power of 3Kw from a 1kw transmitter feeding 3 bays. The tower is 292 feet, located 5 miles west of Iron River Michigan. We currently have filed for an improved license of 50 Kw at a frequency of 96 which should be forthcoming in 90 days. If you would ever pick us up at that frequency, please write again!

Again, thanks for the letter, and my best to you in one of my favorite areas....P-Town!

Northland Adv. INC
