

Mr. Ernest R. Cooper
5 Anthony Street
Provincetown, Mass.
02657

9/9/85

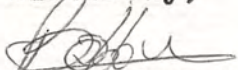

Dear Mr. Cooper:

First my apologies for your not receiving a verification letter upon your initial request. I had passed your letter on to the engineering department and apparently it was lost in the shuffle.

It is obvious from your log that you did indeed receive our signal on Monday 6/24/85. It might interest you to know that during that same week we received phone calls from two Georgia communities where people were receiving our signal. One was from the town of Gartersville who reported our signal strength was superior to that of many Atlanta stations only fifty miles away. It might also interest you to note that this individual also reported picking us up on a Realistic receiver. I do not remember the model number but apparently their equipment is popular among enthusiasts such as yourself.

I hope that I have provided you with the information you seek, and wish you happy listening..

Sincerely,

Bobby Mercer
Program Director
