Dear Ernest,

Thanks for your report of June 18, 1991. I enclose a QSL card confirming that it was indeed WANC, Ticonderoga that you heard. WAMC purchased the former commercial station (WXTY) that did have a CHR format last August. We now retransmit the non-commercial programming of WAMC, Albany over the station.

I also can attest to the wild listening conditions last week. I was on the road near Newburgh, NY on the 19th listening to WAMC on 90.3 when what I believe to have been CBNM, Marystown, Newfoundland came crashing in for a few minutes with full quieting stereo!

Well, here is verie number 600. Congratulations! I know how it must feel. I am working for 100 countries verified on shortwave (and getting close). 73's.

Sincerely,

David A. Galletly  
Assistant Executive Director
