Box 74 Long Island, New York 11747 (516) 423-6740 (212) 895-5040

19 April 1984

Mr. Ernest Cooper
5 Anthony Street
Provincetown, Mass. 02657

Dear Mr. Cooper,

Thank you for your reception report of WCTO, dated 15 April. The programming details you furnished are entirely accurate.

WCTO operates, as you have noted, on 94.3 MHz, with an effective radiated power of 3 kilowatts at an antenna height of 300 feet. We are on the air 24 hours a day (as if you hadn't already guessed!).

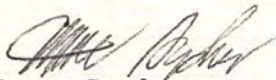

You might someday try receiving our sister station, WGSM (AM), located at 740 kHz. WGSM operates during daytime hours only with 25,000 watts of power. We use a Harris MW-50B transmitter feeding a four-tower directional array, with nulls toward Boston (protecting WCAS Cambridge), Philadelphia, New York City and Canada. Because of the Boston null, you might find reception difficult, but I know we do cover large areas of Connecticut, Rhode Island and Massachusetts, so maybe...

I'm sorry I can't furnish you a coverage map for WCTO, or for WGSM. We seem to to be out...at least I can't find any.

I am glad to hear of your increased involvement in WOMR. In addition to my responsibilities at WGSM/WCTO, I run a community station in Westchester, where I live, and I certainly know how difficult it is to find capable volunteers. Keep it up.

You mention in your October letter that you most frequently listen to WWHB. I might mention that popular singer/songwriter Paul Simon is part of a group that just purchased that station.

Again, thanks for your report, and continued best of luck with your association with WOMR.
