Dear Ernest;

Enjoyed your reception report and have enclosed a QSL card for your collection.

It's true that our effective radiated power is only 600 watts, but with a 2 bay Jampro circular polarized antenna on top of that 450 foot tower we are 650 feet above average terrain and that's all it takes to put out a full Class A signal. Everything else being equal, height is always preferable to power in FM broadcasting.

The Mr. Seitz you spoke of was Frank A. Seitz Jr., the owner of the stations at that time. WFAS is named in honor of his father. Since 1976 WFAS has been owned by Affiliated Broadcasting which is a division of Affiliated Publications, the owners of the Boston Globe. So we really are a Massachusetts company.

Sorry we don't have a coverage map available right now but I have enclosed some promotional pieces about our programming.

Best regards;

Bill Draper, C.E.
