Dear Mr. Cooper:

This is to verify your reception of WYNY on May 30, 1980  
from 10:10 to 10:55 PM.

WYNY transmits from atop the Empire State Building with a  
height of 1300 feet and an Effective Radiated Power of  
7.2 Kilowatts, in stereo, 24 hours a day.

You're right, the band was obviously open. Continued success  
in DXing!

Sincerely,

MSO:jam
