Hello Ernie:

Thank you for your correct report of WBUR. This letter is verification of the report. WBUR operates with 20,000 watts effective radiated power from a transmitter site in East Providence, RI shared with WHJY-FM and WHIM-AM. We operate from 6:00AM to 3:00AM all week. I have never heard of anyone else requesting a verification from us so I guess you've got the DX record, hi. Also have not come across any coverage maps, alas.

It's a long, long way to 4,000 FM verifications, but this is a start!

Good luck in your DXing.

Craig Healy
