March 2, 1972

Dear Carl:

Received your QSL the other day, thought I'd take a few minutes out to confirm.

When I saw your receiver was an SX-71 my mind jumped immediately to the mid-50's when I first became interested in SWL, and then months later, not being able to contain my joy with this new-found hobby, went out and got my ham ticket. To this day I still hold the call K6MRY. I have spent many, many hours twirling the bandspread knob of the "71".

As for well-known "graduates" of this radio station..(those who have gone on to become famous nationwide)...perhaps before Ralph Edwards should come Jack Webb of "Dragnet" fame..and Merv Griffin. KFRC has a rich history in that it was once a member of the Don Lee-Mutual network. Until a couple of years ago we had an engineer that worked here for some 38 years. And, two others just about that long. The thrilling radio stories they could tell!!

As for your listed log of KFRC programming you were tuned in to the latter half of our 11:40pm newscast. The announcer should have been Bob Safford.

Enclosed, and hopefully you can make use of it, is a further token of our appreciation.

73's

Ron Casteel
Director, KFRC Public Affairs
