Oct 18-1965

Dear Mr. Carl Dobilstein.

This is to verify your reception of KOKO on Sept 16-1965

Sorry to have been so long in answering but we have been busy rebuilding station which was totally destroyed in June 16 flood here in Denver -

Normally station is 1000 watt directional with main lobe 15° east of true north pointing northeast to southwest - at time of your letter we were on 250 watts feeding only the center tower which was the only erected on that date -

On Oct 15 we returned to full power and directional again -
