Dear Carl,

this is a letter of verification of your reported reception of Radio 14, on November 24, 1975.

I certainly appreciate your call, and it certainly wasn't any problem setting up this date for testing, because it was quite beneficial in our part too.

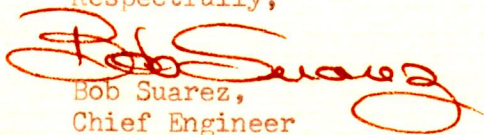

KSIR, is still awaiting a decision from the Commission in reference to our application for increase in power. I hope that it will be soon, and will contact you when I do a proof of performance on the 1 Kw.

I think that i've mentioned to you that I also engineer for KLMO in Longmont. I will also be doing proofs there in the month of January or later. KLMO is 10 Kw, and usually takes me a couple of times before it makes proof.

Incidentally, I recieved about 5 calls the night I did the testing, including one from Los Angeles, California. I certainly appreciate the works of dedicated hobbist, and certainly wish there were more in the Broadcast Industry!

I appreciate recieving a copy of the IRCA, and please express my thanx to the memebers.

Respectfully,

Bob Suarez,
Chief Engineer

P.S. Please accept this personal invitation to stop and see our facilities when you come to visit the Village.
