2/9/75

Carl

We were on the air from 0050 to 0100
to make frequency measurements. We have
been doing them at night since the
failure of our frequency counter. I will
be fixing it within the next few months
and will be doing the reading during the day.
We are on the air seldom at night
except for FCC. regrant. tests.

Thank You for your reception report

Gene J. Wright
