

September 7, 1979

Thank You for your report of the reception of WGTO radio.

WGTO operates at 540 kHz with a daytime power of 50,000 watts and a nighttime power of 1,000 watts from studios at Cypress Gardens, Florida, just south of Lakeland/Winter Haven.

Our transmitters are located ten miles north of Cypress Gardens between Lakeland/Winter Haven and Haines City, Florida.

During times of emergency, such as the latest hurricane (David) WGTO is designated as the primary Emergency Broadcast and Civil Defense station for the state of Florida and as such is permitted to operate continuously during the emergency with our full daytime power of 50,000 watts.

Your reception report is most appreciated. We have received letters from listeners throughout the entire United States.

Should you ever visit this part of the state, please accept my invitation to visit the WGTO facility.

Again ... Thank You for your interest in WGTO-54.

Kindest Personal Regards,

Dr. Frank L. Berry
WGTO engineering
