Mr. Carl Wl Dabelstein
National Radio Club
3300 North 56th Street
Lincoln, Nebraska 68507

Dear Mr. Dabelstein:

Was happy to hear from you today. The onformation you sent us was correct as stated. We're on the air the second Thursday of each month for the purpose of making our monthly frequency measurement test. What you heard was the test for November. We transmitt on a frequency of 1430 KHz, with a power output of 5000 Watts, directional, both day and night. When making these tests after midnight, we operate on the day pattern. Our broadcast day begins at 0500 Centreal Time and continues until 1200 midnight Centreal Time. Our monthly frequency measurement test is scheduled to begin at 0100 Central Time, and continue until 0115. Maybe you will catch us again sometime in the future.

We are glad to hear from our listeners at any time. Thank you for your interest.

Very truely yours,

Reed Kinney,
Asst. Engineer
