Dear Mr. Dabelstein,

This is to verify your reception of WTOC Radio on October 4, 1976. Our AM station is simulcast with our automated C&W FM from Midnight to 6:00AM. Your copy of our station ID was accurate.

WTOC-AM operates 24 hours a day on 1290 KHz. The nighttime pattern is directional at 5000 watts and is shaped roughly like a figure eight. The two main lobes point directly east and west to protect stations in New England and in the Virgin Islands. The largest of the two main lobes is directed over the Atlantic Ocean.

Your reception is one of the furthest for which we have received a request for verification. Thank you for writing and continued good luck in your DX endeavors.

Sincerely,

Michael J. Grady
Chief Engineer
