Omaha 44, Nebraska

Dear Carl,

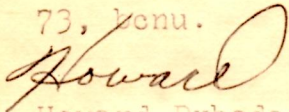

Happy to verify your reception of our station during our frequency test of July 3. We were running 1000 watts at the time with 1 kc tone and voice ID from 0015 until 0030 est.

We normally run 1 kw. daytime with 250 watts after sundown. Am inclosing one 0.5 mv/m. contour for each power which will give you an idea of our location as well as coverage.

Incidentally, on the night that you reported our reception, we were heard in upper Michigan and eastern Ohio.

Thanks for the report, Carl. Lots of luck.

73, Yenu.
