Dear Carl.

Thank you for your report of reception on February 23, 1973

Your information was correct for the date indicated. WKAN Studio's are located in downtown Kankakee and programs are fed to the transmitter via equalized telephone lines to the transmitter building three miles North East of Kankakee. WKAN is 1000 Watts non-directional daytime, 500 Watts directional night time. We use three  $\frac{1}{4}$  wave triangular uniform cross sectional antenna's. Single tower daytime, three tower night. Studio and transmitter equipment consist of Gates, Magnecord, A.T.C. Ampex and Raytheon.

It is our wish to provide the best in music, news, (local, regional and national ) and sports, to the many listeners of WKAN.

Very sincerely yours,

*R. H. Eckels*  
Richard H. Eckels.  
Chief Engineer.
