March 27, 1972

Mr. Carl W. Dabelstein
3300 North 56th Street
Lincoln, Nebraska 68507

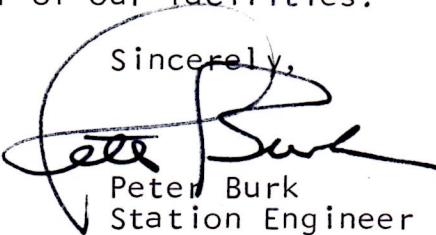

Dear Mr. Dabelstein:

Thank you for your report of reception of WQUA on November 29, 1971. Upon checking our logs, we find that your report is accurate.

WQUA operates on 1230 kcs. with a daytime power of 1000 watts and a nighttime power of 250 watts. Our transmitter is a Collins model 820-D, with a pair of 5-500 tubes in the final power amplifier. The antenna is $\frac{1}{4}$ wavelength (208 feet) shunt-fed, self-supporting tower, providing a non-directional pattern.

WQUA's normal operating schedule is 24 hours daily. We invite you to listen for WQUA in the future and we would appreciate receiving your signal and reception reports. Should you ever happen to be in our area, please stop by for a tour of our facilities.

Sincerely,

Peter Burk
Station Engineer
