Omaha 44, Nebraska**

Carl,

**Sorry I didn't answer your letter sooner.
We are in the process of installing a new
transmitter and new tower phasing equipment.**

**Mr. Baker is no longer with the station, he
is at our sister station in Marion, Indiana.**

**I will be very glad to verify your reception
of WKAM on the night of March 23, 1964.
We were on the air for the purpose of a
frequency check and pre-heating new transmitter
tubes.**

**The 10¢ was not necessary as I am always
happy to verify QSLs. Yours is one of the
few we have recieved from Nebraska.**

**Thank you for your interest in WKAM and keep
listening as we will be going full time within
the next few months..**

Regards,

**Allan B. Corwin
Chief Engineer
WKAM**
