P. O. Box 1087  
Coffeyville, Kansas 67337

316 - 251-3800

Thank you very much for your DX report. We enjoy hearing from our listeners in distant places, so far New Zealand and Italy being the most distant.

Here is some information you may find interesting about KGGF Radio. During the day we operate with 10,000 watts of power, or two towers. At night we operate with 5,000 watts, using four towers. Both day and night patterns send most of the power to the south west.

The station went on the air in 1930, and is one of the oldest stations in South East Kansas.

Our broadcast day starts at 5:00 a.m. and ends at 12:00 p.m. Our programming is Adult Contemporary Music, ABC News and Sports.

Again, we say thank you for your DX report, good luck and have fun with your hobby.

Sincerely,

Jack Maxton  
KGGF Chief Engineer

*The winner of our contest was Paul Ormrod, from New Zealand*
