LIBERAL, KANSAS

Dear Mr. Dabelstein;

Thank you for the nice letter. All of the information that you have in your letter is correct since I am the one who ran this frequency test on the morning of Jan. 2nd, 1963. We have a power of 500 watts and transmit during day light hours only. Hope you have lots of good "DX" hunting on the broadcast band.

Sincerely

A.J. McKinney (Chief Engineer)
