December 20, 1973

Carl W. Dabelstein
3300 North 56th St
Lincoln, Nebraska'
68507

Dear Carl,

Thank you for the reception report received from you this week.

Please accept this letter as verification of your reception of Radio Station WXOX, on December 10, 1973, 5:00 a.m. CST (6:00 a.m. EST).

WXOX Is a daytimer running 1 kw, into a one-eighth wavelength antenna, 115 feet tall. (Kind of a short stick, huh?)

The transmitter is a Gates BC-1-J, 1 kw / 500 w job using 807's driving a pair of 833A's. The modulator uses the same line-up. (833A's)

By the way, at the time you logged us, we were running 500 watts, as prescribed by our pre-sunrise authority.

Most of the equipment used at WXOX is Gates. We have just ~~xxx~~ installed a new control room, and have nearly 100% Gates gear. In my estimation, the best broadcast products available.

Thanks again for the report, Carl, and 73.

Yours truly,

Ron Hale - W8KIN, C. E.
