Dear Carl:

I am happy to confirm your reception of KDUZ on the morning of December 23rd, 1976 during our proof of performance tests.

Yours is the only report we received from this test which is not too surprising since we only gave an identification toward the beginning and end of the test.

KDUZ has been broadcasting since 1953. A gates BC-1F transmitter feeds 1000 watts of power to a 200 ft. tower based about 1050 ft. above sea level.

We thank you very much for your report.

Sincerely,

Darrel Gender, chief tech.
