It is a pleasure to hear from you regarding KPRM's radio signal in your particular community. We feel that in order to facilitate sending letters to the many people we have heard from, that we are enclosing this letter in form that will either approve or disapprove your reception report. You will note on the bottom it is checked either as a verification or non-verification of your reception report.

In many cases, we have received letters that have strictly identified a tone and cannot specifically identify the tone as KPRM Radio because they did not receive the ID of this station. Therefore, they will be marked non-verification.

It is a sincere pleasure to be able to cooperate with members of the National Radio Club and we feel that it is important that verifications are authentic and we are therefore taking this stand in our verification letters.

If in the future the National Radio Club would like KPRM Radio to once again run a program of this type during our frequency testing operation, we will be more than happy to do so in order that stations that have not copied us in this test will be able to copy us in future tests.

JANUARY 31, 1968 *ED*

Approved

Sincerely yours,

*Ed De La Hunt Jr.*

Ed De La Hunt
